INSTALLATION

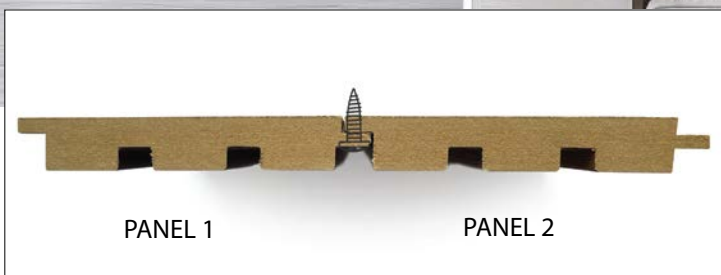

Panel the wall with either aluminum channels or plywood as the base.

Fixing the panel: Drill screws on the lower side of the first panel at intermittent distances.

Overlap the upper side of the second panel on the first panel.

Again drill the screws on the lower side of the second panel.

As we repeat the process, screws are hidden and we achieve perfectly consistent panelling.

MANUFACTURING PROCESS

- Refining raw wood fibers for quality.
- Gluing, pressing and calibrating into uniform panels.
- Routing wooden panels into desired designs.
- Applying textured PVC finishes on top layer.
