for live APPLICATION

In order to elevate your selection experience, we introduce an exclusive delight: a special QR code featuring an assortment of chic designs. Simply scan it with your mobile device, and you'll be treated to a mesmerizing 360-degree preview of your selected laminate design, completely transforming and enriching your decision-making process.

VIEW
OF PRODUCT

When it comes to renovating an older home or crafting a new one, laminate sheets become an essential consideration. In today's age, people desire a deeper connection with their living spaces, blending both emotional and practical elements. That's why we encourage the use of laminate in your home. But we understand the importance of seeing is believing. As a solution, we present a revolutionary approach: A complete 360-degree showcase of every laminate option, offering a precise preview of their appearance when applied.

SALIENT FEATURES

Laminates sheets have several properties that make them suitable for a wide range of applications
Durability: Laminates sheets are highly resistant to scratches, impact, moisture, heat, and chemicals, making them ideal for high-traffic areas such as hospitals, schools, airports, and hotels.

90° BENDING PROCESS IN PVC LAMINATES EDGE BAND TAPES NOT REQUIRED

STEP 01

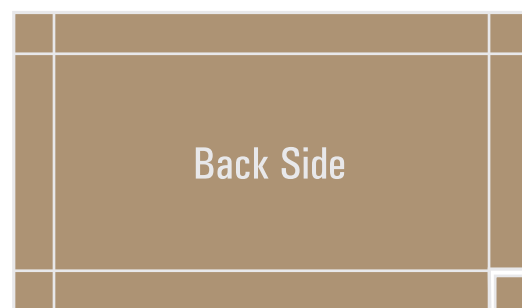

Cut your sheet as per your desired size and shape.

STEP 02

Use a V-groove cutter (available easily in the market) to mark a groove on the sheet.

STEP 03

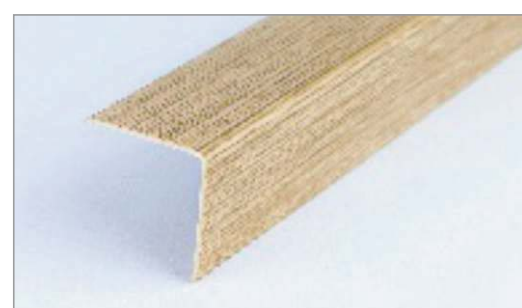

Next, use a regular pair of scissors to trim the edges out.

STEP 04

Place the sheet front up and use the groove marks to bend the sheet towards the outside.

STEP 05

Now your sheet is ready to be used.

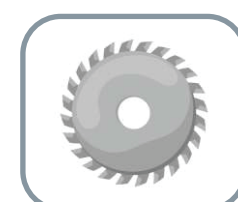

USE PVC INNER
SAVE TREE
SAVE NATURE

**Diamond
cutter blade**

For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting, ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

**Router
blade**

A 4"x8 mm x 6 Tee Radius C-groove blade should be used for bending Virgo PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

WHITE

INNER SHEETS

OFF WHITE

Thickness : 0.82mm (± 0.05)

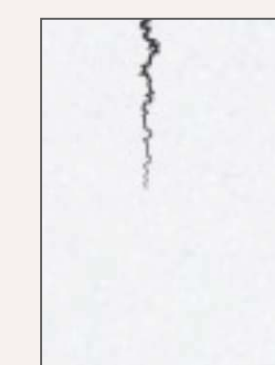

Size : 8' x 4' (2440mm x 1220mm)

Thickness can be from 0.7 to 1.2 as per requirement

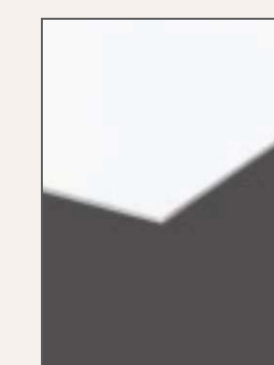

- HIGHLY DURABLE** : PVC Laminate have long durability as compared to any finest company laminate sheet.
- CRACK FREE** : PVC Laminates Does not get cracked after applied like as regular HPL Laminates do.
- UNICOLOR EDGE** : PVC Inner sheet is with unicolor sheet were as HPL Laminate is not Unicolor so edges are easily visible.
- WATER PROOF** : PVC Laminate Inner sheet is water proof so can be applied at water effected area without any worries.
- HIGHLY FLEXIBLE** : PVC Laminate is easily transportable the problem of cracking sheet of breaking sheet during the transportation by falling of striking is not visible. PVC sheet is very flexible and of very high strength.
- LESS FEVICOL** : For pasting PVC Laminate is used and consumption of per sheet is 25% less as compared to fevicol used in HPL sheet as over all cost remains same.

HIGHLY FLEXIBLE

CRACK FREE

- Thickness

: 1.2 mm (±10%)
- Sheet Size

: 8'x4' Feet (2440mm x 1220mm)
- Wild Range

: Our Lamination come in wide range of colors designs.
- Adhesive to be used

: For Superior results. We recommend Special Adhesive for PVC and Acrylic Laminates. These Laminates are easy to apply with all normally used with plastic Laminates such as water based and solvent based adhesive. We do not recommend use heat activated adhesive.
- Cutting and Machining

: Laminates can be cut, router and drilled, with most standard. Wood working tools or equipments, all blades must be sharp, to remove any burrs that may occur in the cutting process, we recommend the use of a smooth, file to feather all corner Edges.
- Lamination

: Proper substrates must be used and careful bonding procedures must be observed Substrates should be of good quality plywood, high density particle board or high quality fiber board. The face of the substrate must be smooth and free of grease, wax, dust, chips and other foreign matter.
- Bending and forming

: Crystal PVC Laminate can be bent and all radius bending should be handled in the same manner as all grades of non post forming decorative Laminates.
- Uses

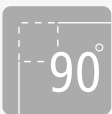

: When used on other type of horizontal surfaces they should be protected with glass or any other equivalent material. They can be used for kitchens, cabinetry, columns, ceiling, furniture, doors and also for commercial use wherever a modern contemporary look is desired.
- Care and Maintenance

: Micro fiber clothes can be used for cleaning the surface after pre soaking. Surface should not be cleaned using a dry cloth. No scouring or abrasive cleaning material must be used since these will damage the brilliance of the surface gloss. Window cleaners, thinners, acetone, ammonia or other aggressive chemicals should not be used for cleaning.

KINDLY REMOVE THE PROTECTIVE FILE AFTER 7 DAYS OF INSTALLATION OF LAMINATES.
