ELEMENTS

INSTALLATION

- Panel the wall with either aluminum channels or plywood as the base.
- Fixing the panel: Drill screws on the lower side of the first panel at intermittent distances.
- Overlap the upper side of the second panel on the first panel.
- Again drill the screws on the lower side of the second panel.
- As we repeat the process, screws are hidden and we achieve perfectly consistent panelling.

MANUFACTURING PROCESS

- Refining raw wood fibers for quality.
- Gluing, pressing and calibrating into uniform panels.
- Routing wooden panels into desired designs.
- Applying textured PVC finishes on top layer.
